

Heatmap showing the expression of 19 genes across 12 samples. The genes are listed on the left: ME1, ME2, ME3, ME4, ME5, ME6, ME7, ME8, ME9, ME10, ME11, ME12, ME13, ME14, ME15, ME16, ME17, ME18, ME19. The samples are listed at the bottom: 0123456789101112. The heatmap shows a color scale from red (high expression) to blue (low expression). A dendrogram on the left indicates clustering of the samples. A color scale bar at the top indicates the expression level, ranging from 0 to 100.
